Built-in Bluetooth Wireless Technology

Top of the line Dual receivers have built-in Bluetooth, allowing the user to conveniently and safely integrate their smartphones and other devices into the car’s audio system. The technology supports the three most popular profiles: HFP, A2DP and AVRCP.

Audio Streaming and Player Control (A2DP and AVRCP)

Allows for wireless audio streaming from a mobile phone or a media player to the car’s receiver. Control your media player directly from the receiver’s front panel while also enjoying quality sound from your car’s speakers.

Hands-free Calling (HFP)

Allows phone calls via the car’s audio system using most Bluetooth enabled cell phones, including the iPhone and other smartphones. Answer a call, redial, or manage call waiting – all while keeping your hands on the wheel and eyes on the road.
Multi-Format Audio Support

Dual receivers are compatible with today’s most popular digital audio formats: MP3, WMA and AAC. Most Dual receivers support all these formats, allowing the user to bring their entire music collection to the car via CD, USB drive, SD card or media player.

CD Playback Mode

Most Dual CD receivers allow playback of MP3/WMA/AAC data CDs in addition to traditional CDs and CD-R/RWs. Know what is playing at a glance with ID3 tag display of artist and track information.

SD Card Playback Mode

Many Dual audio receivers feature an SD card input, allowing the user to access their music library (up to 32GB of MP3 or WMA files) via an SD/SDHC card. The SD card inputs are conveniently located on the front panel or behind the faceplate of the receiver.

USB Playback Mode

Most Dual audio receivers feature USB inputs, allowing the users to access their music library (up to 16GB of MP3 or WMA files) via a USB flash drive. The USB inputs are conveniently located on the front panel of the receivers.

... Enhanced In-Car Entertainment and Safer Driving Habits.

Dual is one of the first car audio manufacturers to offer SiriusXM-Ready receivers, allowing the user to easily expand their in-car entertainment by adding satellite radio. The SiriusXM Connect universal-tuner connector allows the SiriusXM Vehicle Connect Tuner Kit (sold separately, SiriusXM subscription required) to be plugged in directly to the receiver without the need for special cables or adapters.
TECHNOLOGY

Direct USB Control for iPod®/iPhone®
Plug in your iPod or iPhone via the USB input and control it directly from the receiver's front panel. Browse the music library, change songs and adjust volume – all safely, within arm’s reach, while enjoying high-quality sound from the car speakers. The connected device will also charge, so it is ready to go when you are.

RGB Custom Colors
With over 32,000 color variations, our RGB Custom Colors feature allows the user to match the receiver’s LCD and button illumination to the vehicle’s interior lighting; or even create a color that fits the mood!

HD Radio Ready™ with iTunes Tagging
Step up to HD Radio™ for a crystal-clear, digital experience with no monthly fee. HD Radio delivers FM radio with CD quality sound, and AM radio with FM quality sound. The HD Radio Ready feature supports HD2/HD3 multicast channels and offers iTunes Tagging capability when used with the HDM90 tuner (sold separately). iTunes tagging gives the users the ability to “tag” all of their favorite songs for later preview and purchase from the iTunes store.

Direct USB Control for iPod®/iPhone®
Plug in your iPod or iPhone via the USB input and control it directly from the receiver's front panel. Browse the music library, change songs and adjust volume – all safely, within arm’s reach, while enjoying high-quality sound from the car speakers. The connected device will also charge, so it is ready to go when you are.
Full-Graphic LCD

The 4-line, full-graphic LCD features vibrant colors, icons and small images, making it easy to identify the receiver’s mode and to read information such as song title, artist, caller ID and phone numbers. The 4-line list mode allows the user to see more information at a glance, which is very useful when browsing the library of music, for example.

Digital High-Definition LCD

Dual’s multimedia DVD receivers feature digital, LED backlit, high-resolution displays for a brighter, clearer and more detailed visual experience with a longer life span than traditional LCDs. The high-resolution 1.15 megapixel displays offer 3 times the resolution of a standard analog display.

High-Performance Speakers

The DLS 4-way, high-performance speaker series feature a balanced dome midrange for enhanced clarity, an injection-molded polypropylene woofer cone for accurate bass response, a rubber surround to withstand heat and moisture, dual Piezo tweeters for extended high-frequency response and a low-profile basket design for installation flexibility.

Portable Device Mount

The adjustable, Portable Device Mount provides added value for today’s connected consumer. As consumers increasingly use their smartphones for navigation and music streaming, device integration into the head unit is not only a matter of convenience, but also safety. The Portable Device Mount adjusts to fit most smartphones, iPhone and iPod devices.

Steering Wheel Control-Ready

Replace the factory-installed head unit without losing the convenience of controlling the receiver directly from the steering wheel. (Third party adapter required.)
This 2.0 DIN multimedia receiver boasts a 6.2" digital, LED backlit, high-resolution (1.15 Megapixels) display. Direct USB control for iPod and iPhone devices is available through the USB input on the back. The input also supports video playback (IPV40 cable required). The front panel features SD card and 3.5mm auxiliary inputs to connect other portable media devices. Two dedicated video outputs on the back allow for the connection of additional monitors. The receiver is back-up camera ready.

XDVD3201 2.0 DIN DVD Multimedia Receiver

This 1.0 DIN multimedia receiver boasts a large 7" digital, LED backlit, high-resolution (1.15 Megapixels) display. Direct USB control for iPod and iPhone devices is available through the USB input on the back. The input also supports video playback (IPV40 cable required). The front panel features SD card and 3.5mm A/V inputs to connect other portable media devices. Two dedicated video outputs on the back allow for the connection of additional monitors. The receiver is back-up camera ready.

XDVD3101 DVD Multimedia Receiver
XDVDN9131 DVD Multimedia Receiver with Navigation

This versatile DVD Receiver features a 7” motorized LCD with detachable front panel, plus an integrated navigation functionality with pre-loaded maps for the continental USA, Alaska, Hawaii, Puerto Rico and Canada. The built-in Bluetooth Wireless Technology supports hands-free calling, audio streaming, and player control. Direct control for most iPod devices is available via a 2-wire connection on the front panel (cable included). Also features front panel USB, SD card and 3.5mm A/V inputs.

XPE1700 Mono Amplifier

Featuring performance-matched output transistors for maximum power transfer and black anodized extruded aluminum heat sinks for dissipating the heat. Direct-wire inputs eliminate the need for extra terminals while ensuring a more positive connection through increased wire contact. In addition, thermal overload and low-impedance circuits provide protection for even the most demanding applications.

XPE4700 4/3/2 Channel Amplifier

Featuring variable high-pass and low-pass crossovers with a 12dB/octave crossover slope and a 0, 6 or 12dB bass boost. For installation flexibility, it also includes high-level and low-level inputs - accommodating connection to OEM and aftermarket head units.

XPE2700 2/1 Channel Amplifier

Featuring simultaneous stereo and bridged operation, allowing for the connection of both full-range speakers and a subwoofer to the amplifier.
